## FOREFRONT SF BURNER

- Capacities from 500,000 to 10,000,000 BTU/Hr.
- Simple, Rugged, & Reliable
- Short Compact Flame Geometry
- Low Emissions (NO<sub>x</sub>, CO, VOC, & PM)
- 20:1 Turndown Ratio
- Low Gas Pressure
- Outdoor or Indoor Applications
- User-Friendly Tuning
- Quick Delivery

### OVERVIEW

The Forefront SF is an industrial package burner for gas firing applications that require a compact, highly efficient, Low NO<sub>x</sub> flame. The flame characteristics of the Forefront SF, in conjunction with the burner's heavy duty user-friendly design, makes it ideal for a whole host of industrial furnaces firing applications such as:

- Air heating (ovens, dryers, kilns, etc.)
- Process Heaters
- Incinerators
- Boilers

### DESCRIPTION

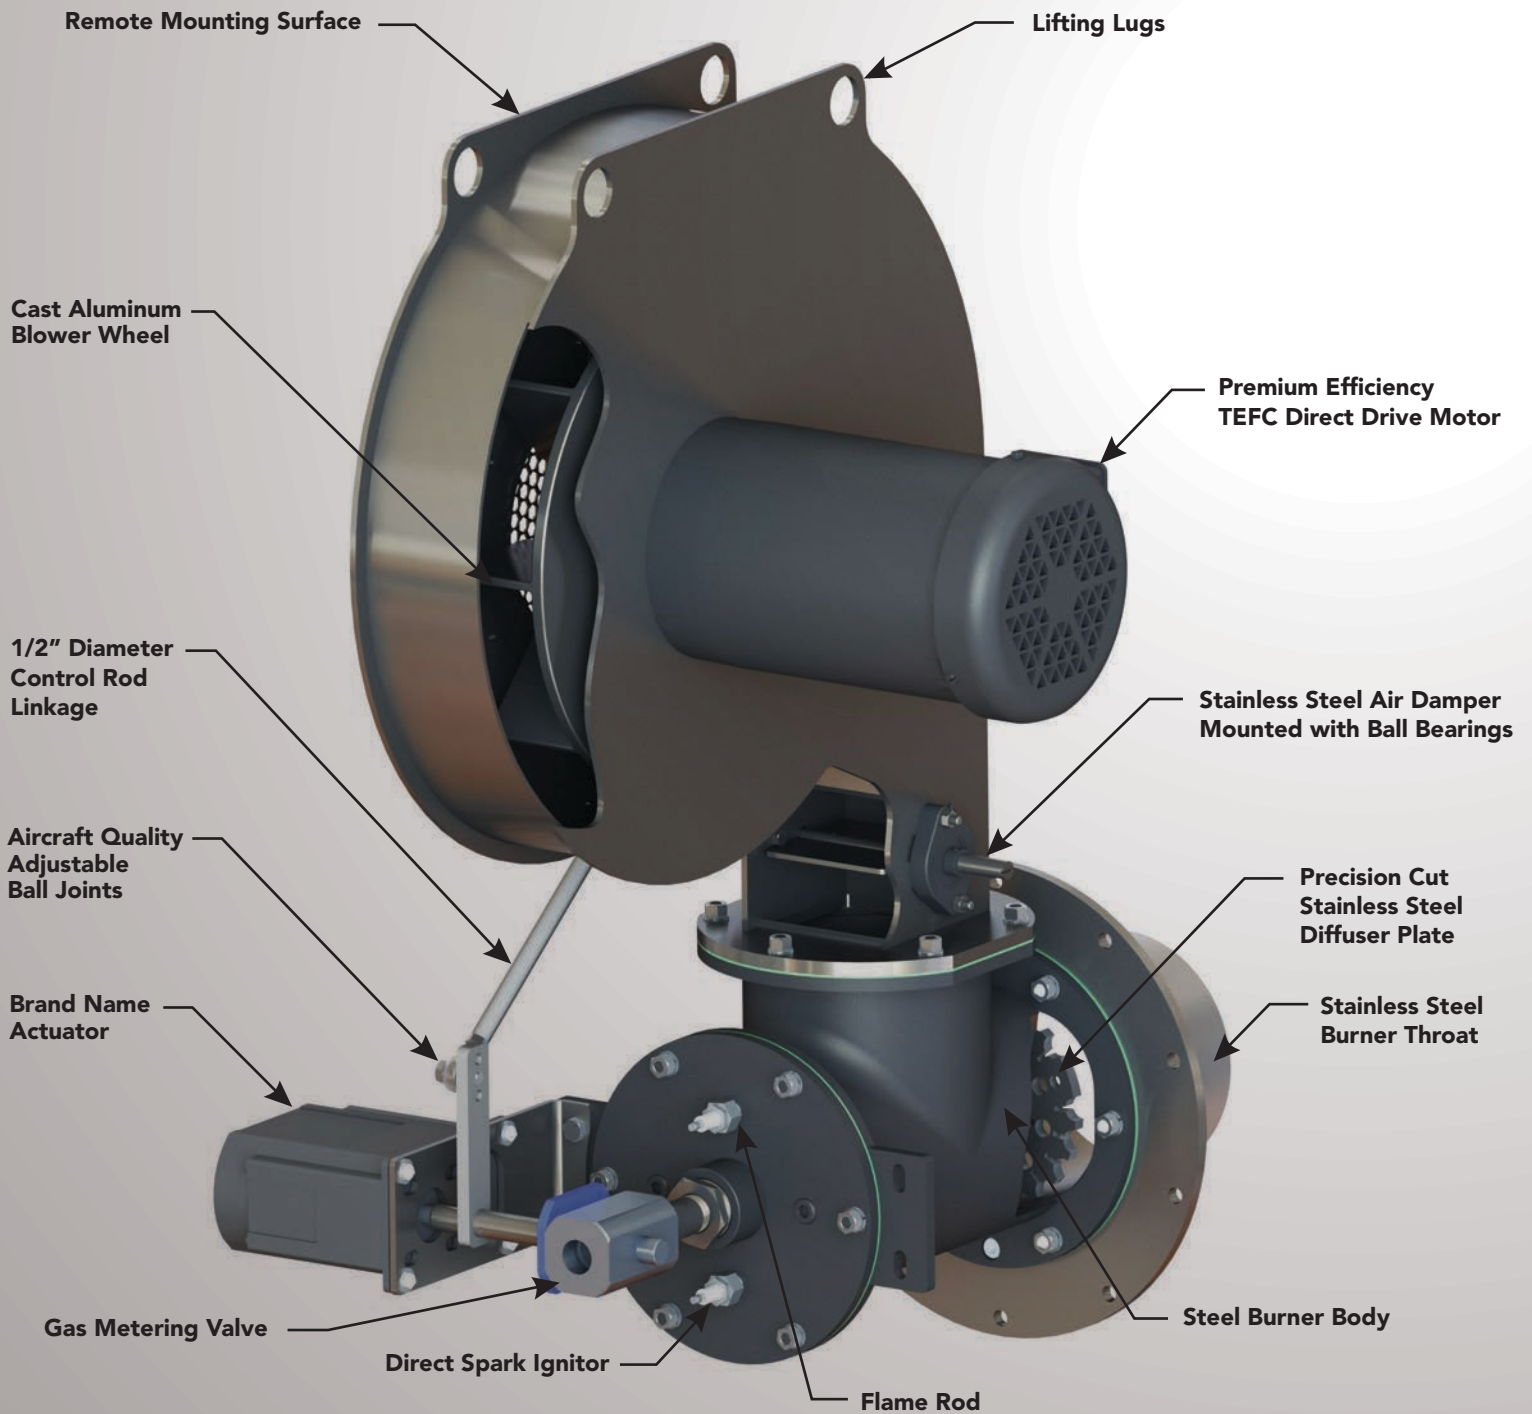

The base burner includes an all steel burner housing with direct spark ignitor and flame rod, stainless steel burner throat, fan assembly with integral air damper, combustion air switch, gas valve, and actuator. The air and gas valves are mechanically linked together with easily adjustable industrial duty control linkage.

Results may vary. Contact factory for details.
